

Three Cents Fig Leaf Soda

The name comes from the Great Depression era when soda bars were in existence. At soda fountains people would order plain carbonated water as 'Two Cents Plain' as it was the cheapest drink one could get. When flavored syrup was added, like vanilla or cherry or sarsaparilla, the total cost would be Three Cents.

The first "handmade" Greek collection of carbonated drinks was inspired by bartenders for bartenders for a simple purpose, to work as a base for cocktail recipes as life is too short for a bad gin tonic. To be used as the ultimate mixer for cocktails and long drinks maintaining their fizziness down to the last drop. How? By carbonating their formula above 5 atm and keeping it natural. Soon they were consumed by many as soft drinks and are now being the protagonist at numerous hip bars both in Greece and abroad.

Having innovation at heart, Three Cents introduce, for their 10-year anniversary, a unique new soda flavor, Fig Leaf Soda. Collaborating with a micro-community to harvest by hand the best Fig Leaves of the Royal Fig variety (*Ficus Carica*) from a PDO area. Fig Leaf Soda is specially designed to deliver a one-of-a-kind taste and maximum carbonation to each drink.

Three Cents Fig Leaf Soda is crafted using a specialized and original method for the aromas extraction to safeguard high quality & health safety. Each bottle contains ~2 fig leaves to reach the topmost flavor & aroma. Using natural ingredients, without any preservatives or artificial colorings. Carbonated in very high pressure to ensure longer lasting carbonation and a full flavor experience.

Create a gentle and earthy twist of the Americano cocktail. Ideal to compliment Tequila long drinks, and perfectly combined with coconut in your cocktails. Mixing with whisky to create a distinctive Old Fashion twist. Or enjoy it neat for a refreshing moment.

Packing: Glass bottle 200ml

Carton: 24bottles x 200ml

Ingredient List: Water, Sugar, Carbon Dioxide, Citric Acid, Quinine, Natural flavors

Nutrition Facts (per 100ml): 39 cal, Fat 0g, Carbohydrates 9.4g (Sugars 12.5g), Proteins 0g, Salt 0g

Shelf life: In the original, unopened container, dry, no sunlight, 10 to 30°C storage: 365 days from the production date.
