

# MYLONAS

## Naked Truth Savatiano

### HISTORY -

Mylonas Winery is a third generation (since 1917) boutique winery located 30mi south of Athens. The petite but contemporary winery is built in the village of Keratea with the 12 ha of their vineyards being scattered in Attica's peninsula. They farm traditionally, mainly Greek grape varieties, with respect and trust to the terroir. Attica's has a unique terroir rich in minerals & limestone soils. The mild Mediterranean climate acts as an ally and the old vines produce their most concentrated grapes in low yields. Mylonas philosophy is based on minimum intervention from the vineyard to the bottling. When you have great vineyards that produce high quality grapes of distinctive individual character, this is not only environmentally and socially responsible approach, it's also the best way to consistently make fine wine.

### ECOSYSTEM -

Naked Truth is a single vineyard wine. The vineyard 'Vouno' produces around 20hl/ha every year of a very concentrated fruit. The gravelly soil over limestone gives a unique expression of the Savatiano grape.

### VINIFICATION -

Grapes are hand harvested and taken immediately into the winery. Cooling at 8° C, destemming and spontaneous alcoholic fermentation with 20 days on the skins at controlled temperature in small stainless steel tanks.

### AGEING -

Aged in steel for three months on the fine lees with frequent stir.

### TASTING NOTES -

Bright golden color. Complex aromatic character with floral, herbal, and earthy aromas that create a very special bouquet. Full-bodied taste that is wonderfully balanced by the lively acidity. Complex aromatic palette, similar to nose perfumes that give complexity and incredibly long duration to its finish.

**COMPOSITION -** 100% Savatiano

**ALTITUDE -** 250 meters

**REGION -** Attica-Keratea

**IRRIGATION -** Dry Farmed

**CLASSIFICATION -** P.G.I. ATTIKI

**ALCOHOL % -** 12.0%

**AGE OF VINES -** 56 years

**PH -** 3.32

**VINE TRAINING -** Bush vines (Gobelet)

**TOTAL ACIDITY -** 5.9 grams/liter

**SOIL PROFILE -** Gravel, Mineral Rich Soil Over Limestone
