

# THREE CENTS

## Aegean Tonic

The name comes from the Great Depression era when soda bars were in existence. At soda fountains people would order plain carbonated water as ‘Two Cents Plain’ as it was the cheapest drink one could get. When flavored syrup was added, like vanilla or cherry or sarsaparilla, the total cost would be Three Cents.

The first “handmade” Greek collection of carbonated drinks was inspired by bartenders for bartenders for a simple purpose, to work as a base for cocktail recipes as life is too short for a bad gin tonic. To be used as the ultimate mixer for cocktails and long drinks maintaining their fizziness down to the last drop. How? By carbonating their formula above 5 atm and keeping it natural. Soon they were consumed by many as soft drinks and are now being the protagonist at numerous hip bars both in Greece and abroad.

In order to enhance the flavor of their tonic with the spirit of the Mediterranean, Three Cents came up with a truly authentic product. A Greek tonic that could be enjoyed alone as a beverage or as a mix for long drinks and cocktails. Three Cents Aegean Tonic Water is a light and refreshing as the Mediterranean Sea breeze. A pleasant revitalizing tonic water made by high quality natural quinine, cucumber, basil and other herbs, spices and citrus from the Greek land. A tonic water so invigorating and sharp that will bring your long drinks and cocktails to life.

Perfect for adding a Mediterranean twist and a vibrant character to a low alcohol cocktail, Three Cents Aegean tonic captures the Aegean in a glass. Try this premium artisanal tonic water with gin, Campari tequila or Greek mastiha liquor, and embrace the spirit and bliss of the Mediterranean. So exquisite and unique in taste that it was voted as the best spirit/ bar product at the Bar Convert at the Mixology Awards in Berlin. The label with the drawing of the dolphin reflects its playful and spirited character.

**Packing:** Glass bottle 200ml

**Carton:** 24bottles x 200ml

**Ingredient List:** Water, Sugar, Carbon Dioxide, Citric Acid, Quinine, Natural flavors

**Nutrition Facts (per 100ml):** 50 cal, Fat 0g, Carbohydrates 12.5g (Sugars 12.5g), Proteins 0g, Salt 0g

**Shelf life:** In the original, unopened container, dry, no sunlight, 10 to 30°C storage: 365 days from the production date.
